## Wire Rope Slings

Hoisting Equipment Specialists manufacture and supply a comprehensive range of wire rope slings. Used as single leg or in multi leg slings with appropriate fittings, wire rope slings cover all general lifting applications. Hand and machine spliced wire rope slings are available in black, galvanised or stainless steel. Suitable for a range of applications including lifting, tie-down, towing, crane ropes and winching. Sizes range from 2mm to 28mm with larger sizes available on request.

### Ordering Wire Rope Slings

When ordering wire slings please supply the following important information:

- Quantity
- Effective length
- Sizes of eyes and end fittings
- Diameter and/or capacity
- Type of splice
- Construction of wire rope

### Swaged and Fitted Slings

A range of swaged fittings are available for fitting to wire rope slings in single-leg or multi-leg applications.

## Do you need Height Safety Attachment Anchor Points?

Enquire about our supply and installation service.

## Height Safety Training

**Are you working at heights or in confined spaces?**

AS1891.4-2009 states all users of fall arrest equipment and all people associated with harness based work at heights shall undergo training and be assessed by a nationally accredited training facility offering general height safety courses for operators.

Hoisting Equipment Specialists can organize training for your staff through Nationally Accredited Training provider Spanset.

Spanset deliver consistent and concise training specific to the client's needs. Spanset trainers are highly qualified personnel with extensive industry experience.

Spanset are leaders in the development of Working at Heights, Confined Space and Rescue and Evacuation Training with training ranging from half day to 3 day courses.

**SpanSet**

**Inspect-Safe**

## Inspection Services

Hoisting Equipment Specialists offer a comprehensive on-site inspection service covering all lifting and rigging equipment. Inspections are conducted by our qualified inspectors and reports provided detailing current status of all equipment.

Our qualified staff will program regular inspections to suit your requirements. Visual inspections of chain slings, wire rope slings, webbing and round slings and spreader bars can be performed on-site as required.

## General Service & Repairs

Hoisting Equipment Specialists offer fully equipped repair workshops in which our staff can inspect and repair a comprehensive range of lifting and rigging gear.

A complete selection of spare parts for most items is kept in stock, enabling efficient and effective repairs to be made to the following items.

- Chain Hoists
- Lever Hoists
- Chain Slings
- Plate Clamps
- Electric and Manual Winches
- Wire Rope Pullers
- Hydraulic Pumps and Rams
- Electric and Pneumatic Hoists

All service work is carried out by fully trained and qualified technicians and tested to meet Australian Standards.

## Lifting Equipment Installations

Design, manufacture, installation and certification of standard and customised lifting equipment

**Installation of:**

- Post jib cranes
- Monorail beams
- Load bearing and height safety anchor points
- Manual, Electric and Pneumatic Hoists (including electrical work)
